Baldwin, Florida and Eden Prairie, Minnesota. May 18, 2025 – Wunderlich-Malec Engineering Inc. (WM) and Gervais Ventures are proud to announce the grand opening of WM’s new state-of-the-art manufacturing facility in Baldwin, Florida. Designed for sustainability, this 61,000-square-foot facility will support WM’s rapidly growing Modular Electrical Control Enclosure and Skid Fabrication business, complementing their existing 105,000-square-foot facility in Winslow, Maine.

Gervais Ventures (GV), a certified woman-owned Florida general contractor, functioned as Construction Manager Advisor for this innovative Baldwin, Florida manufacturing facility. GV managed the day-to-day site construction and subcontractors and completed the project on schedule and on budget. Wunderlich-Malec self-performed the majority of the architectural and engineering design for the project including civil, structural, mechanical, and electrical. Local engineering partners were also key contributors in specialty disciplines.

The Baldwin, Florida facility will be totally integrated with WM’s Winslow, Maine facilities and its ISO 9000:2015 certified manufacturing process to deliver the highest quality fully integrated and factory-tested modular power systems. This facility will be a cornerstone for WM to provide turnkey power solutions for our customers. WM is unique in the industry in our ability to self-perform electrical power engineering, physical substation design, P&C engineering, Power Relay Settings, equipment procurement, Modular Fabrication, full electrical testing services of Relays and all point-to-point connections including IEC 61850 communications. WM performs site installation supervision, testing and commissioning with qualified commissioning engineers.

“For over 43 years our 100% employee-owned company’s success has been built around our strong customer commitment. Our investment and collaboration with Gervais Ventures created the most modern and innovative manufacturing facility, which will add greater value to the integrated fabricated solutions we deliver to our customers.” says Neal Wunderlich, President.

The Baldwin facility is designed to reflect WM's core values of **productivity, quality, and innovation**, with features that include:

- **Productivity** – Purpose-built features enhance operational efficiency while promoting a safe, supportive environment for employees.
- **Quality** – Wunderlich-Malec engineers and manufacturers with ISO 9000-2015-compliant quality system.
- **Innovation** – Communications, production and system testing enhance the productivity of our employees and the quality of our deliverables by using advanced technology and innovation.

“Our ongoing investments in people, technology, and these new modern facilities will provide our customers with increased value, timely delivery, and the continued highest quality in the products we manufacture.” says Dan Gilbert, Vice President, Wunderlich-Malec.
