Engineering Superior Solutions

Exceeding Your Expectations Through Collaboration & Innovation

Employee Owned. Customer Focused.

Corporate Capabilities

Our Culture Creates Project Success & Long-Lasting Relationships

Our commitment to **innovation & collaboration** results in exceptional project delivery. Wunderlich-Malec's (WM) core pillars **Pledge, Process & People** enable us to not only meet but **exceed your expectations**.

Industry leading expertise of WM's employee owners & nationwide local offices provide unparalleled long-term client support.

Success Achieved By Our Core Values

Innovation & Collaboration

Operational Excellence

Trust & Transparency

Complex Problem Solving

Quality Process

Empower Employees

Safety First

Sustainability Commitment

Expert-led Client Focused Innovation & Collaboration

Industry-leading **subject matter experts** support engineering teams to exceed client expectations.

Innovation & collaboration sets **WM** apart from other firms. New **innovative engineering solutions** solve your most demanding challenges.

Engineers Skilled in Digital Transformation

Digital technology plays a crucial role in improving efficiency & productivity for businesses. This requires **a transitional path with the existing technology and cybersecurity**.

Our **knowledgeable industry leading experts** stay current with digital tools & techniques that complement your skilled teams to create solutions that achieve your goals.

Proven Capabilities & Client Collaboration Meet Your Needs

Control Systems, SCADA & MES Integration

IT/OT Convergence, Networks, Cloud Applications, Cybersecure

Successful IT/OT Convergence is achieved with proven technologies & seamless integration with existing systems by our team with certified experts.

Project Planning & Management

We collaborate with clients during project development & provide Feed studies for clients KPI's evaluations.

Packaging

Packaging solutions are successfully provided to Food, Beverage, & Life Science customers.

Industrial Water Treatment

WM industrial wastewater treatment skids & systems improve water quality, recycle water & lower the wastewater surcharge.

National Top-Tier System Integration Firm

Since 1981 successful delivery of control & automation systems has been a core competency resulting in repeat business & continuous growth. Leading control system & software suppliers certify WM as their partner to deliver the customer's preferred system.

World Class Manufacturing Facilities

Your custom modular control enclosures will be designed, built, tested, & delivered direct to the site. Our Winslow facility is ISO 9001:2015 quality certified & our professional engineers ensure all state & local codes are met. Field teams will test & commission all substation equipment installed on the site.

Facility Engineering & Design Services

Our multidisciplinary team of professional engineers will design-build your project from concept to life-cycle success.

Control Panels, T&D Relay Panels

Three WM facilities provide design & fabrication services to UL(cUL)508A, UL698, UL698A standards.

Environmental Information Systems

Emission reporting systems gather, record & submit as required by state and federal regulators.

Substation Modular Enclosures With Test & Commissioning Teams

Electric Utility & Rotating Equipment Control

We design, build & commission T&D systems for utilities & C&I facilities. Specialists provide controls & protection for Rotating Equipment.

Energy & Microgrids

Energy experts will analyze customers' energy sources & usage to lower costs with sustainable resilient solutions.

Receive Superior Solutions For Your Most Demanding Challenges

Digital Transformation

- **Automation & Control Systems**
- **Manufacturing Execution Systems**
- **IT/OT Convergence**
- **Industrial Networks**
- **Cloud IT/OT Applications**
- **Cybersecurity**

As a **certified system integrator** partnering with industry-leading automation suppliers our **skilled nationwide team** specializes in cutting-edge technologies, **delivering successful automation projects**. We provide ongoing support in network design & security, aiding clients in IT/OT convergence & cloud-based applications with **seamless digital transformations**.

Professional Design Services

- **Electrical & Power Engineering**
- **Facilities Engineering**
- **Mechanical & Process**
- **Architecture**
- **Civil/Structural**
- **Capital Project Management**

Our commitment to **innovation and client collaboration** has positioned us within the upper half of **ENR's top 500 US design & engineering firms**. Our team of licensed engineers span all states. We leverage our diverse knowledge & expertise to **ensure each project is delivered** to achieve its objectives with **cost-effective designs**.

Equipment Systems

- **Modular Integrated Control Enclosures**
- **T & D Substation Relay Panels**
- **Electrical Test & Commission**
- **Control Panels**
- **Packaging Solutions**
- **Rotating Equipment Control**

Wunderlich-Malec packaging solutions meet the demands of productivity, machine control, & production flexibility. **Modular Integrated Control Enclosures** & T&D relay control panels provided to the nation's leading utilities are **built in our ISO 9001:2015 certified Maine facility**. The Minnesota panel shop provides UL qualified control panels.

Sustainability Solutions

- **Energy Sustainability Planning**
- **Microgrids & Renewables**
- **Environmental Information Systems**
- **Industrial Water Treatment**

Energy experts consult with your team to **create innovative strategies** & practical solutions that **achieve your energy sustainability and resiliency goals**. Our Environmental Information Systems make **EPA reporting effortless**. With leading technology providers our skid solutions **reduce your wastewater costs** & municipal surcharges.

Engineering Experience You Can Count On Since 1981

- **Control System Integration**
- **Manufacturing Execution Systems**
- **IT/OT Convergence Systems**
 - Industrial Foundation Networks
 - Cloud Based IIOT Applications
- **Panels & Modular Manufacturing**
 - Control Panel Fabrication
 - Substation Modular Enclosures
- **Facilities Engineering**
 - Mechanical Designs
 - Process Engineering
 - Electrical Engineering
- **Electrical & Power Engineering**
 - Power Engineering for Substation T&D
 - Power Automation, Monitoring & SCADA
 - Electrical Testing & Commissioning
- **Architectural & Civil/Structural**
- **Federal A-E Design Service**
- **Design Packaging Solutions**
- **Rotating Equipment Control System**
- **Environmental Information Systems**
- **Energy Sustainability & Microgrids**
- **Industrial Water Treatment**
- **Capital Project Management**
