

We've Solved Your Standby & Sustainable Power Challenges

With modular, plug & play switchgear, cleaner backup power solutions, & advanced dispatch software that reduces costs & lowers carbon emissions.

Reduces Your Energy Costs

Scalable Solutions Operate In 12 Months

Lower Carbon Emissions

Equipment, Software & Service Support

Advanced Technology For Dispatch With Solar & Storage

- ***Eliminate peak costs & hedge volatile power markets.***
- ***Gain access to lower cost renewable grid power.***
- ***Avoid backup diesel power's environmental challenges with natural gas generators.***
- ***Turnkey built site power generation system in 12 months.***
- ***Provides expandable electric distribution for site renewable energy, storage & EV charging.***

Our Simple Step By Step Process

- Preliminary Feasibility and Financial Screening – at no cost.
- Define the Permitting, Interconnect, & Operating Strategies.
- Provide Equipment and Installation Design – EPC Cost Bid Package.
- Offer Business Case & Financing Options.

Engineering Experience You Can Count On Since 1981

- **Control System Integration**
- **Manufacturing Execution Systems**
- **IT/OT Convergence Systems**
 - Industrial Foundation Networks
 - Cloud Based IIOT Applications
- **Panels & Modular Manufacturing**
 - Control Panel Fabrication
 - Substation Modular Enclosures
- **Facilities Engineering**
 - Mechanical Designs
 - Process Engineering
 - Electrical Engineering
- **Electrical & Power Engineering**
 - Power Engineering for Substation T&D
 - Power Automation, Monitoring & SCADA
 - Electrical Testing & Commissioning
- **Architectural & Civil/Structural**
- **Federal A-E Design Service**
- **Design Packaging Solutions**
- **Rotating Equipment Control System**
- **Environmental Information Systems**
- **Energy Sustainability & Microgrids**
- **Industrial Water Treatment**
- **Capital Project Management**
